CLAC

DEO-LOTION

Fly-Repellent

CLAC Deo-Lotion is based on natural essential oils. CLAC prevents any contact with insects molesting your horse. Now no flies, horseflies or gnats will spoil your riding joy.

CLAC's improved formula also contains olive oil and Vitamin E for the care and protection of the coat and the skin. Also natural, cold-pressed grape seed oil was added. This highly valuable, edible oil by nature contains a high concentration of OPC (Oligo Proanthocyanidine), one of nature's most powerful antioxidants which will protect your horse's coat and skin against free radicals.

Direction for use:

It can be applied to the coat with a spray, cloth or sponge. It should be rubbed into the coat first against the direction of growth and then in the same direction as growth.

AVOID CONTACT WITH HORSE'S OR HUMAN'S EYES OR MUCOUS MEMBRANES!

In case of eye-contact immediately rinse with plenty of water and contact a physician if complications occur.
