

How To Tie a Rope Halter

Step 1

Slip noseband over nose.

Step 2

Pull the rope around over the horse's poll and behind the ears. Then bring back the end of the rope to the open loop that will lie over the left cheek.

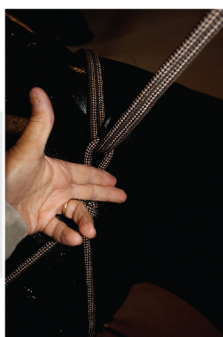

Step 3

Pull rope through loophole.

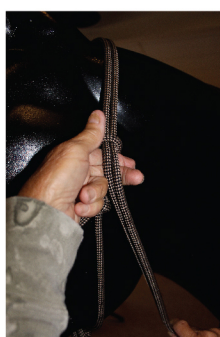

Step 4

Pull rope up to create snug fit for the halter. Make sure that the horse is still able to move their head and jaw comfortably.

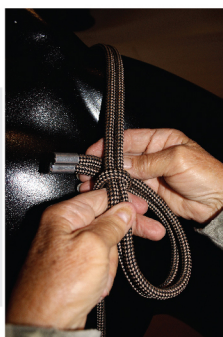

Step 5

Place two fingers in the middle of the loop lying flatly on the horse's cheek.

Step 6

Pull rope over the top of your fingers.

Step 7

Pull rope around the bottom of your fingers and behind the loop. Make sure you do this below the loop and not above it.

Step 8

Pull rope through the circle you just created to lock the knot tight and pull tightly back in the direction of the horse's hindquarters.

The more comfortable the horse, the better the performance.
